PROFESSIONAL EXPERIENCE

Job Placement Office – Batangas State University Lipa | Lipa City, Philippines
Data and Operations Intern | February 2026 – May 2026

- Utilized interactive reporting dashboards to monitor recruitment activities and provide data-driven insights into placement trends.
- Managed and cleaned applicant databases using Excel to ensure data integrity and facilitate efficient tracking of candidate information.
- Designed professional marketing collateral (posters, flyers, templates) to increase engagement, and auditing corporate partnership documentation to ensure compliance.

Tech Executive Labs | Lipa City, Philippines
Research and Impact Associate Intern | January 2025 – April 2025

- Aggregated a comprehensive Philippine geolocation dataset, integrating urbanization classifications and demographic metrics for granular regional analysis.
- Evaluated startup ecosystems through comparative case studies of high-growth and failed ventures to identify critical success factors.
- Analyzed program data to assess the effectiveness of technology-driven initiatives and provided key insights to support strategic decision-making.

EDUCATION

Batangas State University, The National Engineering University | Lipa Campus
Bachelor of Science in Information Technology, Business Analytics Track | 2022 – 2026

PROJECTS

DairyBox: B2B E-Commerce Platform | Capstone Project (Project Manager/Developer)

- Developed a responsive B2B e-commerce solution for a local dairy cooperative, successfully streamlining order operations, inventory management, and increasing direct sales channels.
- Cleaned 22 months of raw sales data to resolve inconsistencies, and integrated a predictive analytics module to forecast demand, optimize stock levels, and minimize product spoilage.

HR Strategic Insights Dashboard | Personal Project

- Extracted and grouped workforce data from relational databases using SQL and multi-table JOINS to build an interactive, end-to-end Power BI dashboard.
- Organized data into a structured Star Schema model to analyze employee lifecycles, using CASE logic to allow granular filtering of attrition risks and recruitment status.
- Calculated advanced key performance metrics to evaluate the direct relationship between employee engagement, training results, and L&D program effectiveness.

ESG & Financial Performance Hub | Personal Project

- Developed an automated data cleaning pipeline via SQL Views, applying CASE logic to handle null values and segment companies into ESG performance tiers.
- Implemented global filtering and dynamic parameters across 9 distinct industries, allowing stakeholders to perform highly granular comparative assessments.

Sales Forecasting Dashboard | Academic Project

- Built a dynamic, responsive web dashboard using Python and Flask to visualize product-level sales, facilitating faster, data-driven decision-making.
- Integrated predictive modeling algorithms to process historical data and anticipate market demand trends.

CERTIFICATIONS & CONTINUING EDUCATION

- **Data Analytics in Excel** – Great Learning, 2026
- **Business Intelligence using Excel Basics** – Simplilearn, 2026
- **Data Visualization with Power BI** – Great Learning, 2026
- **Introduction to Google Analytics 4** – Great Learning, 2026

TECHNICAL SKILLS

- **Programming & Databases:** Python, SQL, JavaScript, PostgreSQL
- **Web Frameworks:** Flask, React.js
- **Tools & Platforms:** Power BI, Tableau, Microsoft Excel, Google Colab, Visual Studio Code
- **Core Competencies:** Data Analysis, Data Modeling, Data Visualization, ETL, Project Management
- **Languages:** English, Filipino
