EXPERIENCE

Tech Executive Labs | Lipa City, Philippines | Research and Impact Associate Intern | January 2025 - April 2025

- **Aggregated a comprehensive Philippine geolocation dataset**, integrating urbanization classifications and demographic metrics to facilitate granular regional analysis and market assessments.
- **Evaluated startup ecosystems** through comparative case studies of high-growth and failed ventures to identify critical success factors and emerging market trends.
- **Analyzed data to assess the effectiveness of technology-driven programs** and provided key insights to support strategic decision-making.

Job Placement Office Batangas State University Lipa | Data and Operations Intern | February 2026 - May 2026

- **Utilized reporting dashboards** to monitor recruitment activities and provide data-driven insights into placement trends.
- **Managed and cleaned applicant databases using Excel** to ensure data integrity and facilitate efficient tracking of candidate information.
- **Designed professional marketing collateral**, including posters, flyers, and job posting templates, to increase engagement and visibility for placement programs.
- **Monitored and audited company requirements** for corporate partnerships, ensuring all documentation and compliance standards were met for successful collaborations.

EDUCATION

Batangas State University, The National Engineering University Lipa Campus | Lipa City, Batangas

Bachelor of Science in Information Technology, Business Analytics Track | 2022- 2026

PROJECTS

DairyBox: B2B E-Commerce Platform | Capstone Project | Project Manager/Developer

- **Developed a responsive B2B e-commerce solution** for a local dairy cooperative, successfully streamlining order operations, inventory management, and increasing direct sales channels.
- **Implemented a secure Role-Based Access Control (RBAC) system**, managing permissions for Administrators, Customers, and Inventory Staff to ensure data integrity.
- **Cleaned and prepared 22 months of raw sales data**, resolving inconsistencies, missing values, and duplicates to ensure accurate analysis and reliable forecasting
- **Integrated a predictive analytics module** that processes historical sales data to forecast demand, directly helping the cooperative optimize stock levels and minimize product spoilage.

HR Strategic Insights Dashboard | Personal Project

- **Developed a data pipeline** by extracting and grouping workforce data from relational databases using SQL to create an interactive Power BI dashboard.
- **Analyzed business scenarios** regarding the employee lifecycle, using CASE logic and multi-table JOINS to look at workforce performance and hiring trends.
- **Organized the data into a Star Schema model** to allow for filtering and detailed views of attrition risk, department metrics, and recruitment status.
- **Calculated key metrics**, such as training results and the relationship between engagement and performance, to help identify effective L&D programs.

ESG & Financial Performance Hub | Personal Project

- **Developed an automated data cleaning pipeline via SQL Views**, applying CASE logic to handle null values and segment companies into ESG performance tiers.
- **Designed an interactive Tableau dashboard** featuring dual-axis trend analysis, scatter plots, and regional maps to visualize the correlation between ESG scores and profit margins.

- **Implemented global filtering and dynamic parameters** to ensure full interactivity across 9 industries, allowing stakeholders to perform granular comparative assessments.
- **Synthesized complex performance trends** to identify how sustainability initiatives drive long-term financial value, presenting findings through executive-level visual storytelling.

Sales Forecasting Dashboard | Academic Project

- **Built a dynamic web dashboard using Python and Flask** to visualize product-level sales, facilitating faster, data-driven decision-making.
- **Integrated predictive modeling algorithms** to anticipate market demand trends, enabling businesses to refine their inventory planning strategies.

SKILLS

- **Programming & Databases:** Python, SQL, Javascript
- **Web Frameworks:** Flask, Reactjs
- **Tools & Platforms:** Google Colab, Microsoft Excel, Visual Studio Code, Power BI, PostgreSQL, Tableau
- **Core Competencies:** Data Analysis, Data Modeling, Data Visualization, Project Management, ETL
- **Languages:** English, Filipino
